ASG Consulting Services

The Exclusive Benefits of ASG Solution Services

What distinguishes ASG Consulting Services from other solution providers?

1

Cross Disciplined Solutions and Delivery Capabilities

Because Advanced Systems Group (ASG) maintains partnerships with all of the industry's leading companies, our engineers have an enhanced understanding of heterogeneous environments—so our team can provide customers with a more comprehensive range of services.

"The ASG engineer was definitely well suited to our project. He had a holistic, comprehensive understanding of our data center—at the same time, he could also drill down on the individual details and specific technologies."

2

The Highest Levels of Accountability and Professionalism

With their impressive history of providing successful customer IT service solutions, our experts deliver superior performance through their personal accountability and professionalism.

"The ASG engineer's expertise and ability to transfer the knowledge were exceptional. He was very helpful while answering all my questions, and he even helped me discover new questions that needed answering. I look forward to working with ASG again."

3

Flexible Scheduling

ASG recognizes the need to protect crucial business operations. That's why we offer flexible scheduling—weekends or evenings, we'll adjust the project schedule to best suit your needs.

"When we had issues with the migration of data on our NetApp filers, the ASG engineer worked with Hitachi and NetApp support to be sure that all data was successfully migrated. This process took about 19 hours on a Saturday. There were also many evenings spent working this project. The ASG engineer's dedication to his work and customers is admirable."

4

A Single Point of Management

ASG offers a single channel of communication for managing all suppliers and contractors on all projects ranging from the simple to complex. ASG will assume responsibility for the team and its work, ensuring a seamless engagement for our customers.

"Our project went extremely well, and we couldn't be happier with the service we received from ASG. The ASG engineers really went out of their way in their efforts to make the team work as well as it did. We've had many, many engineers in here before, and this was by far one of our best experiences."

5

A Responsive, Customer-Driven Business Partner

Developing trusted, long-standing relationships with our customers is our priority, so we try to make the business process as easy and convenient as possible.

"The ASG engineer spent nearly a third of the allocated time becoming familiar with our current architecture and configurations—including our future needs. Once he was familiar with our architecture and my team's level of technical skills, he organized presentations, testing, and proofs of concept that were applicable in our environment and suited our level of technical comprehension."
